

Aetna Advantage Plans for Individuals, Families and Self-Employed

Field Underwriting Guide

Georgia

Aetna Advantage Plans for individuals, families and the self-employed are underwritten by Aetna Life Insurance Company (Aetna) directly and/or through an out of state blanket trust. In some states, individuals may qualify as a business group of one and may be eligible for guaranteed issue, small group health plans. These plans are medically underwritten and your clients may be declined coverage in accordance with their health condition.

Introduction

This guide is designed to assist you in the process of submitting applications for Aetna Advantage Plans for Individuals and Families. It will provide information to help you and your clients to complete the application thoroughly and correctly and thereby expedite the processing time in the Underwriting Department.

Review the application for completeness and accuracy, and ensure that any necessary documents are attached prior to submitting it for final Underwriting.

The Medical Underwriting Risk Criteria section of this guide provides a summary of health conditions commonly encountered in the underwriting process. The underwriting risk criteria will assist you in estimating the underwriting outcome, but final determination will be made

by an Aetna Underwriter. This guide is intended as a brief overview only and is not intended to be the source for underwriting decisions. Aetna reserves the right to place the applicant in the appropriate risk category, request additional information or decline coverage.

Coverage can not be guaranteed and no promises should be made to the applicant(s) when the Application is completed. The final decision will be based on enrollment requirements, health history and medical underwriting risk criteria.

No requested effective date will honored prior to or on the signature date.

This guide and underwriting risk criteria are subject to revision and change at anytime without notice to you.

"Aetna" is the brand name used for product and services provided by one or more of the Aetna group of subsidiary companies.

Age and Family Status Requirements

To qualify for enrollment, all applicants must be:

1. Applicant and enrolling spouse must be under age 64 3/4
2. Dependent children of applicant or enrolling spouse must be under age 19
3. Unmarried dependent children between the ages of 19 to 26 must meet the dependent status as defined by the IRS

Eligibility of Newborns, Adoptees and Foster Children:

1. Foster children do not qualify as a dependent on the Aetna Advantage Plans for Individuals and Families. Foster children may be eligible for enrollment on a Child Only policy and are subject to the complete medical underwriting process and must meet all enrollment and underwriting requirements.

2. Newborn babies, born to a subscriber or enrolled spouse may be added to the parent's plan within 31 days of birth without medical underwriting. If the enrollment request is not submitted within 31 days of birth, the newborn child will be subject to the complete medical underwriting process and must meet all enrollment and underwriting requirements.
3. A newly adopted child of a subscriber or enrolled spouse may be added to the adopting parent's plan within 31 days of placement in the home for the purpose of adoption, without medical underwriting. The adopting parents must provide evidence of the authorization to control medical care. If the enrollment request is not submitted within 31 days of placement, the adoptee will be subject to the complete medical underwriting process and must meet all enrollment and underwriting requirements.

Residency Requirements

To qualify for enrollment all applicants must be:

Legal resident within the state and Aetna Advantage Plan Service Area.

Non-citizen Resident Requirements:

Applicants for the Aetna Advantage Plans for Individuals and Families, who are non-citizen residents of the United States, must provide proof of legal residency in the United States for a period of six months immediately preceding the application for coverage.

At least one of the following items must be submitted with the application as proof of residency for a six month period:

1. Proof of rent or mortgage payments within the United States for the past six months
2. Verification of employment in the United States for the past six months
3. Medical records from a medical office or hospital in the United States, indicating treatment within the United States for the past six months
4. Receipts for utility bills, in the applicants name, within the United States, for the past six months

Items such as Passports, Visas, Drivers Licenses and Social Security Cards do not provide proof of the six-month residency requirement and will not be accepted as proof of continuous residency.

Foreign Exchange Students are not subject to the six-month continuous residency requirement, but are subject to the complete medical underwriting process and must meet all enrollment and underwriting requirements. Foreign Exchange Students applying for the Aetna Advantage Plans for Individuals and Families must submit, with their application, documentation of proof of enrollment in the Foreign Exchange Student Program.

Terms of Coverage

The Aetna Advantage Plans for Individuals and Families is intended to be the sole carrier. Applicants who are currently covered by another carrier must agree to discontinue the other coverage upon the effective date of this Aetna Advantage Plan for Individuals and Families.

Coverage remains in effect as long as the required premium charges are paid on time as long as membership eligibility is maintained. Coverage will be terminated if the member becomes ineligible due to:

1. Non-payment of premiums
2. Residency requirements
3. Obtaining duplicate coverage

Pre-existing Conditions Limitations:

A pre-existing condition is an illness or injury for which medical advice or treatment was recommended or received within the six months preceding the effective date of coverage.

During the first 12 months following a member's effective date of coverage, no coverage will be provided for the treatment of a pre-existing condition.

If the applicant had prior creditable coverage within 63 days immediately before the signature date on the application, then the pre-existing conditions exclusion of the plan will be waived.

Medical Underwriting Requirements

The Aetna Advantage Plans for Individuals and Families are not guaranteed issue plans. All applicants, enrolling spouses and dependents are subject to medical underwriting to determine eligibility and placement within the appropriate risk category. Medical records may be requested by the underwriter for the purpose of evaluating the underwriting risk.

Aetna offers various risk categories based on the known and predicted medical risk factors of each applicant. A member with minimal health risks should not be required to subsidize the cost of covering a member predicted to require more costly care.

Placement in Risk Categories:

Medical Underwriters will assess the risk of all applicants through a review of all information submitted on the application, the health questionnaire, phone interviews and medical records. Following the completion of medical underwriting, applicants:

1. may be enrolled in their selected plan at the standard premium charge
2. may be enrolled in their selected plan at a higher rate, based on medical findings
3. may be declined coverage based on significant medical risk factors

Following is the description of the Risk Categories for each level of coverage.

1. Level A: standard premium
2. Level B: moderate increase over standard premium
3. Level C: significant increase over standard premium
4. Level D: declination, no coverage offered

Reasons Causing Underwriting Processing Delays

An application cannot be reviewed by underwriting until all information has been provided by the applicant(s) and agent. Listed below are the most frequent omissions or errors that cause delays in underwriting:

1. Answers to Health Questionnaire missing or incomplete
2. No details provided for Health Questionnaires with “yes” answers
3. Address information incomplete
4. Omitted height, weight, date of birth or age on applicant and/or dependents
5. Missing signature of spouse and/or dependents age 18 and older
6. Missing name and address of physician or providers in health history
7. Application not dated
8. Changes made to answers without accompanying explanation or initials
9. Broker information incomplete or agent number missing
10. Single check submitted with multiple applications
11. EFT/Credit Card information incomplete

Situations which may result in the application being closed without underwriting include, but are not limited to:

1. Applications which have been completed in pencil
2. Submission of an outdated or expired application form (Old applications will be honored for 90 days after a revision has been issued)
3. Multiple omitted items on the application
4. Application not dated
5. Signature date is over 30 days old or is post-dated
6. Missing signatures of applicant, spouse, over-age dependents
7. Missing signature of parent or guardian for “child only” policies
8. No response to request for additional information, such as medical records or phone interviews

Individual Medical Underwriting: Overview

Medical Underwriting:

The process of reviewing and comparing the medical history of applicants against established underwriting risk criteria in order to determine the appropriate level of risk

Medical Underwriting Theory:

The Medical Underwriting process is designed to identify the potential medical risk and cost for the conditions listed on an application. These costs are predicted on existing and anticipated future:

- Hospitalizations
- Surgeries
- Medical Office Visits
- Out-Patient Therapies
- Prescription Medications
- Laboratory Tests
- Radiological and Diagnostic Tests
- Durable Medical Equipment and Supplies

In our current culture, the cost of prescription medications presents an increased financial risk component for the treatment of acute and chronic health conditions that do not require hospitalizations and surgeries.

Obesity and smoking present an increased risk component in conjunction with specific health conditions that are complicated and/or exacerbated by such conditions or behaviors. Conditions affected by obesity and smoking include:

- Cardiac Conditions
- Hypertension
- Respiratory Conditions
- Gastric or Intestinal Conditions
- Back and Joint Conditions

The assigned risk category is based on the level of severity and potential risk of the listed health condition phone interviews and by review of medical records.

Adverse selection results when there is an excessive coverage of high-risk candidates in proportion to the coverage of low-risk candidates. Through careful review and proper rating of health risks, underwriting guards against adverse selection.

Assistance with Underwriting questions:

If you have specific questions about a health condition, medication, etc, and how these may be evaluated in underwriting, you can submit send your questions to our Individual Underwriting Mailbox.

Underwriting and the Appeals process

Applicants may appeal any underwriting decision if they consider the decision was based on incorrect or outdated information from their Aetna Application health statement or medical records. The applicant may submit an appeal if they:

- Do not agree with the assigned premium rate up
- Do not agree with the declination
- Wish to provide additional or omitted medical information.

In order to appeal the underwriting decision the applicant must submit a written request within 30 days of the underwriting decision and provide the following information:

- A letter requesting the appeal, with the reason why
- A copy of the Aetna underwriting decision letter to the applicant
- Updated or corrected medical records and documentation that supports the appeal request

Appeals will not be initiated based on

- Verbal requests
- Requests made by anyone other than the applicant
- Health care provider letters
- Appeals received after 30 days from the underwriting decision

After 30 days post underwriting decision.

- Requests for premium rate reviews will not be addressed until the policy has been in force for 6 months.
- A new application will be required.

Declinable Conditions and Medications

Many health conditions present an extreme risk due to the high cost of treatment and medications. When such conditions are listed on the application Aetna reserves the right to decline coverage without further review of medical records. Conditions that will result in declination include, but are not limited to the list to the right.

Medications Subject to Decline:

Some medications are costly and present an increased underwriting risk. Applicants may be declined based on the cost of their prescription medications.

Addison's Disease	Lupus Erythematosus, Systemic (SLE)
AIDS	Lymphadenitis
AIDS Related Complex (ARC)	Mediterranean Anemia without Splenectomy
Alzheimer's Disease	Multiple Sclerosis
Amyotrophic Lateral Sclerosis	Muscular Dystrophy
Aplastic Anemia	Myasthenia Gravis
Ankylosing Spondylitis	Myelofibrosis
Arteritis	Organic Brain Syndrome
Arthritis, Rheumatoid	Paraplegia
Bright's Disease	Paget's Disease
Bronchiectasis	Parkinson's Disease
Buerger's Disease	Pneumoconiosis
Burkitt's Tumor	Polyarteritis Nodosa
Cardiomyopathy	Polycythemia
Cerebral Palsy (Infantile)	Polymyositis
Cirrhosis of Liver	Polyneuropathy
Chronic Glomerulonephritis	Portal Hypertension
Chronic Hepatitis	Pregnancy
Chronic Obstructive Pulmonary Disease (COPD)	Psoriatic Arthropathy
Chronic Pulmonary Heart Disease	Pulmonary Heart Disease
Chronic Renal Failure	Quadraplegia
Cooley's Anemia	Raynaud's Syndrome/Phenomenon
Crouzon's Disease	Renal Failure, Chronic
Cushing's, Syndrome	Scleroderma
Cystic Fibrosis	Sickle Cell anemia
Dermatomyositis	Sleep Apneax
Emphysema	Sjogren's Disease
Encephalopathy	Spina Bifida
Endocarditis	Systemic Lupus Erythematosus (SLE)
Esophageal Varicies	Syringomyelia
Guillain Barre's Syndrome	Tay-Sach's Disease
Hemolytic Anemia	Testicular Dysfunction
Hemophilia	Tetralogy of Fallot
Hodgkin's Lymphoma	Thalassemia Major
Human T-Cell Leukemia Virus	Thrombotic Thrombocytopenia Purpura
Human T-Cell Lymphotropic Virus	Transplant; Heart
Huntington's Chorea	Transplant; Liver
Hydrocephalus	Transplant; Lung
IgG Deficiency	Transplant; Lung
Insulin Dependent Diabetes Mellitus	Uremia
Klinefelter's Syndrome	Von Willebrand's Disease

Aetna Proprietary Information

Medical Risk Criteria for Agents

The Risk Criteria section provides a summary of conditions commonly encountered in the medical underwriting process. The Risk Criteria for each condition includes the potential cost for treatment, therapy and medications. The greater the risk, the higher the Risk Category the applicant would be assigned.

Risk is increased by factors such as smoking, use of prescription medications and weight.

In some situations, the listed condition itself may present only a minimal health risk, but the treatment and/or use of prescription medications increase the over-all cost risk. Prescription medications which exceed the acceptable cost range of an assigned risk category may result in a higher risk category being assigned or declination.

Body Mass Index

Body Mass Index, (BMI) is a measure of body fat based on height and weight. The BMI score is valid for both adult men and women. Research data from the National Heart, Lung and Blood Institute has documented that BMI is a reliable indicator of total body fat which is related to the risk of disease and death. For those conditions that include weight as a risk factor, the BMI chart will be used to determine the risk category.

A copy of the BMI chart is included on the next page.

How To Use The BMI Chart:

1. Locate the applicant's height in the left hand column
2. Follow that row to the right until it intersects with the applicant's weight (round off to the nearest number)
3. Follow that column up to the top row of bold numbers
4. The bold number at the top of that column is the BMI
5. See specific conditions and risk criteria for BMI related risk factors

Example: ■ Height = 5'10" ■ Weight = 243 lbs. ■ BMI = 35

Body Mass Index (BMI)

BMI	Ht.		Body Weight in Pounds																									
	Ft./In.	In.	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44

Assistance with Underwriting Questions

If you have specific questions about a health condition, medication, etc, and how these may be evaluated in underwriting, you can submit your questions to our Individual Underwriting Mailbox.

This mailbox provides you with an opportunity to submit an “Underwriting Prescreen Form” and ask underwriting questions related to Aetna Advantage Plans prior to submitting an application.

You can access this submission form by logging on to our Producer World website at: https://www.aetna.com/producer/forms/uw_prescreening_form.html.

To receive a prompt response to your questions, please provide as much detail as you can. We will address your questions within 24 hrs of receipt. The following categories are typical underwriting questions and may help direct your inquiries.

- Age
- BMI (Body Mass Index) / Weight
- Adoption
- Dates & Types of Treatment / Medications
- Residency
- Medical Underwriting Guidelines
- Possible Declinable Condition
- Generic or Other

Note: This submission form should only be used for Individual Underwriting questions related to the Aetna Advantage Plans for Individuals and Families prior to submitting an application. Do not send benefit, plan coverage or rate questions through this mailbox. Please direct those questions and question related to an application already submitted to your Aetna Sales Manager or the Sales Support Center in your region at 1-888-54 AETNA

Alphabetical Index of Medical Conditions

The following conditions are included in the Medical Risk Criteria. The left hand column provides the name of all conditions found in the guide, some are primary conditions and have their own category in the guide, others are subcategories of a primary condition and are listed under that primary condition in the guide. If the condition is listed under a primary condition, the primary condition is noted in the right hand column as a cross reference for location.

TMJ	See: Jaw Disorders
Tobacco Use	
Traumatic Stress Disorder	See: Adjustment Reaction
Tricuspid Valve Disease	See: Heart Valve Disease
Ulcerative Colitis	See: Inflammatory Bowel Disorders
Ulcers	
Urinary Tract Infections	
Vaginal Infections	See: Abnormal PAP

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Abnormal PAP <i>Including:</i> Cervicitis Endocervicitis Vaginal Infections	Single episode 6 or more months ago; no STD; current PAP normal	A
	Same criteria as (A); single episode within 6 months; single STD within 3 years	B
	Two episodes within 18 months; current abnormal PAP with Atypia	C
	Does not meet above criteria or requiring procedure Pathology will be accessed by Underwriter	D
Acid Reflux	See "GERD" (gastro esophageal reflux disease)	
ADD and ADHD	See "Hyperactivity" (Attention Deficit Disorder)	
Adjustment Reaction <i>Including:</i> Acute reaction to stress Adjustment reaction Depressive reaction Post Traumatic Stress Disorder (PTSD)	Acute Episode: related to stressful incident; no hospital admissions required; counseling completed for 6 or more months; no medications for 6 months; no other stress related conditions	A
	Ongoing Adjustment Reactions: current counseling 2 times per month; over age 15 and stable on single medication; hospital admission 5 or more years ago; no other stress related conditions	B
	Stress Related Conditions: Chest Pain Chronic Pain Digestive Problems Fibromyalgia Insomnia Abnormal Heart Beat Migraines	C
	Same criteria as (B); counseling 1 time per week; over age 18 and maintained on 2 medications or age 12-18 and maintained on single medication; hospital admission 18 or more months ago	D
AIDS/ARC	Once Diagnosed	D
Alcohol Abuse: <i>Including:</i> Alcohol Dependency	Acceptable daily intake with no history of alcohol abuse, OR History of alcohol abuse; no treatment, therapy or medications for 5 years; NO alcohol intake for 5 years; normal liver function tests (LFT's); Single DUI within 12 months	A
	Same criteria as (A); no treatment, therapy or medications for 2 years; no alcohol intake for 2 years	B
	Does not meet any of above criteria; 2 or more hospital admissions in 10 years (alcohol related); still consuming alcohol: 2 DUI's	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Allergies: <i>Including:</i> Allergic Rhinitis Hayfever Sinusitis	Controlled with “over the counter” (OTC) non prescriptive medications; occasional use of one or two prescription medications; no smoking/tobacco use	A
	Same as (A); smoking/tobacco use within 12 months	B
	Maintained on one or two prescription medication OR undergoing allergy injections no smoking/tobacco use	B
	Maintained on two prescription medications undergoing allergy injections; OR smoking/tobacco use	C
	Does not meet any of above criteria; potential surgical candidate.	D
Alzheimer’s Disease	Once Diagnosed	D
Amenorrhea <i>Including:</i> Dysfunctional Uterine Bleeding Ovarian Failure Polycystic Ovaries	INDIVIDUAL CONSIDERATION Underlying cause must be determined to evaluate risk	Assessment by underwriter
Anxiety/Depression <i>Including:</i> Anxiety Depression Panic Attacks PMS Stress Related Conditions: Chest Pain Chronic Pain Digestive Problems Fibromyalgia Insomnia Abnormal Heart Beat Migraines	Stable without medication for 3 months; no suicide attempts; no hospitalizations; completed counseling 1 or more months ago	A
	Same as (A); with single hospitalization over 2 years ago; Over age 18 and maintained on single prescription medication; PMS related; periodic counseling	B
	Same as (B); with 2 hospitalizations more than 3 years ago; Over age 18 and maintained on 2 medications; age 12 to 18 and maintained on single medication	C
	Does not meet any of above criteria; may require hospitalization; suicide attempts; requires multiple prescription medications	D
Arrhythmias	See “Heart Disease”	

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Arthritis <i>Including:</i> Osteoarthritis Osteoarthrosis Degenerative Joint Disease (DJD)	No history of surgery or hospitalizations; taking over the counter pain relievers or anti-inflammatory medications; no other joint or back problems OR Not a candidate for or a recipient of reconstructive joint surgery; no steroid use either oral or by injection; no hospitalizations within 2 years	A
	Same criteria as (A); requires prescription strength non-steroidal anti-inflammatory medications; smoking/tobacco use within 12 months	B
	Same criteria as (B); requires 2 prescription pain medications; injection to joints over 12 months ago; smoking/tobacco use within 12 months	C
	Does not meet any of the above criteria; potential surgical candidate or treatment for associated conditions	D
Arthritis Rheumatoid Polyarthritis	Once Diagnosed	D
Asthma <i>Including:</i> Hyperactive Airway Disease (HAD) Reactive Airway Disease (RAD)	No Emergency Room (ER) visits/hospital admissions for 1 year; no oral steroids; occasional use of inhaler or nebulizer; no other treatment or medications for 6 months; no smoking/tobacco use since diagnosis; BMI less than 28	A
	Same criteria as (A); BMI 28-32; no smoking/tobacco use for 12 months; maintained on single oral, nasal or inhaled prescription medication	B
	Same criteria as (B); single course of steroids in 6-12 months; BMI 33-36; single ER visit in 3-6 months; requires daily inhaler or nebulizer or steroid and single oral or nasal medication	C
	Does not meet any of the above criteria; smoking/tobacco use; required hospitalization within 1 year	D
Back/Spine Problems <i>Including:</i> Muscle Spasms Strains Sprains	No injury requiring surgery; no disc problems; no prescription medications; taking "over the counter" (OTC) anti-inflammatory medications only; treatment free for 6 months	A
	Same criteria as (A); receiving maintenance or preventative chiropractic care or massage (2 x month or less); or occasional muscle relaxant	B
	Same criteria as (B); requires prescription anti-inflammatory, muscle relaxant or pain medication; chiropractic or massage therapy up to 1 time per week	C
	Does not meet any of the above criteria; requires narcotic medications; potential surgical candidate	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Back/Spine Problems <i>Including:</i> Disc Problems Sciatica	Does not require surgery; no treatment for 6 months; receiving maintenance or preventative chiropractic care or massage therapy (1 x month or less); using "over the counter" (OTC) pain medications only; BMI less than 30; no smoking/tobacco use for 12 months	A
	Same criteria as (A); no prescription medications for 3 months; receiving maintenance or preventative chiropractic care or massage therapy (2 x month or less); BMI 30-34 OR BMI 25-30 with smoking/tobacco use within 12 months	B
	Same criteria as (B); requires single prescription medication; chiropractic or massage therapy up to 1 time per week; BMI 31-36	C
	Does not meet any of above criteria; potential surgical candidate <i>Additional consideration for:</i> Obesity; condition after surgery; prescription medications	D
Breast Disorders <i>Including:</i> Fibrocystic Disease	Incidental finding; no treatment required; single lesion removed 3 months ago; normal mammogram within 6 months	A
	Same criteria as (A); surgically removed 1-3 months ago; normal mammogram	B
	Multiple excisions/biopsies for fibrocystic breasts; no treatment for 3 months; single excisions/biopsies within one month	C
	Does not meet any of above criteria; potential surgical candidate Undiagnosed lesion; incomplete workup; medical testing or unconfirmed diagnosis	D
Breast Implants Saline Implants Silicone Implants	All surgery and injections completed > 3 months ago; no complications; post operative visits completed with no follow-up required	A
	Same criteria as (A); implants placed < 3 months ago; all other treatment or surgery completed > 6 months ago (including reconstructive surgery)	B
	Same criteria as (B); no treatment for 3 months or implants placed more than 15 years ago	C
	Does not meet any of above criteria; complications; potential surgical candidate	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Bronchitis (Chronic)	No reactive airway disease; single course of oral or injectable steroids 18 or more months ago; no ER visits; no smoking/tobacco use; no treatment for 12 months	A
	Same criteria as (A); required oral or injectable steroids 12 months ago; antibiotic or prescription medication 6 months ago	B
	Same criteria as (B); requires intermittent use of inhalers/nebulizers or steroids; single ER visit in 12 months	C
	Does not meet any of above criteria	D
Cancer Breast	Individual consideration assessed by underwriter	Assessed by underwriter
	Currently under treatment	D
Cancer Leukemia	No treatment for 10 years; normal current physical exam and labs	B
	Same criteria as (B); smoking/tobacco use within 12 months	C
	Does not meet any of above criteria	D
Cancer Skin: Basal Cell	Removed 6 or more months ago; in situ and all borders clear; no reconstructive surgery required; no treatment or medications for 6 months; current exam shows no recurrence	A
	Same criteria as (A); removed 3 months ago; no treatment or medication for 3 months	B
	Recurring lesions requiring up to 2 excisions in 12 months; last excision more than 1 month ago	C
	Does not meet any of above criteria	D
Cancer Skin: Melanoma	Stage 1, borders clear, removed 5 or more years ago; all cosmetic/reconstructive surgery complete; no treatment or medication for 5 years; current dermatology exam confirms no recurrence	A
	Same criteria as (A); smoking/tobacco use within 2 years; no treatment or medication for 3 years	C
	Does not meet any of above criteria	D
Cancer Skin: Kaposi's Sarcoma	Once Diagnosed and related to HIV diagnosis	D
Cancer <i>Including:</i> Internal Organs Systemic Cancers	Most cancers that fall within these categories are complex. The level of consideration depends on original diagnosis; pathology reports; type and length of treatment; treatment-free period and recurrence rates.	Assessed by underwriter

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Cerebral Palsy	Over age 10: minimal spastic movement; no mental retardation; no wheelchair or walker or crutches; capable of independent living; no PT or orthopedic correction for 2 or more years	B
	Same criteria as (B); no treatment for 12-24 months	C
	Does not meet any of above criteria	D
Cirrhosis of Liver	Once Diagnosed	D
COPD Chronic Obstructive Pulmonary Disease Emphysema	Once Diagnosed	D
Colitis Crohn's Disease	See "Inflammatory Bowel Disease"	
Deafness	Does not require surgery or surgically corrected 6 or more months ago with normal hearing restored; no vertigo or balance problems; no hearing aid required or recommended; no treatment for 6 months	A
	Same criteria as (A); treatment free for 3-6 months or requires a hearing aid	B
	Same criteria as (B); surgically repaired 1-3 months ago; still having hearing and/or balance problems; may require hearing aid	C
	Does not meet any of the above criteria; potential surgical candidate; cochlear implant present	D
Depression	See "Anxiety/Depression"	
Diabetes Mellitus	Type II; Non-Insulin Dependent: Controlled by diet for over 12 months; BMI less than 30; no smoking/tobacco use; no kidney, vision or circulation problems; acceptable laboratory test results	B
	Same criteria as (B); controlled by diet 6-12 months or controlled on oral medication; BMI 30-32	C
	Does not meet any of above criteria	D
	Type I; Insulin Dependent	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Diverticulitis Diverticulosis	Incidental finding with no treatment required OR controlled by diet 2 or more years; no bleeding; no hospitalization required; no treatment for 2 years	A
	Same criteria as (A); single hospitalization 2 or more years ago; no therapy, treatment or medications for 12 months	B
	Same criteria as (B); no treatment for 6 months	C
	Does not meet any of the above criteria	D
Drug Abuse Illegal Drugs	No illegal drug use for 10 years; no intravenous drug use ever; no therapy, treatment or medications for 10 years except for ongoing attendance to Narcotics or Alcoholics Anonymous	A
	Same criteria as (A); no drug use for 5-10 years; no therapy, treatment or medications for 5-10 years	B
	Does not meet any of the above criteria	D
Drug Abuse Marijuana use Only	No Marijuana use for 1 or more years; no chronic respiratory conditions; no therapy, treatment or medications for 2 years except for ongoing attendance to Narcotics or Alcoholics Anonymous	A
	Same criteria as (A); no marijuana use for 6 months; no therapy, treatment or medications for 1 year.	B
	Does not meet any of above criteria	D
Drug Abuse Prescription Drugs	No abuse of prescription drugs for 5 years; no therapy, treatment or medications for 5 years except ongoing attendance at Narcotics or Alcoholics Anonymous	A
	Same criteria as (A); no prescription drug abuse or treatment for 2-5 years	B
	Does not meet any of the above criteria; still abusing prescription drugs; two or more hospital admissions in 10 years	D
Ear Infections Otitis Media	No hearing loss; ear tubes placed previously; does not require precautionary antibiotics or decongestants; no treatment for 6 months	A
	Same criteria as (A); ear tubes in place; requires precautionary antibiotics and decongestants; no infection for 2 months	B
	Same criteria as (B); with multiple infections (3-4) in 12 months; acute infection within 2 months; may require ear tube placement	C
	Does not meet any of the above criteria	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Eating Disorders <i>Including:</i> Anorexia Bulimia	No hospital admissions for 5 years; counseling completed 12 or more months ago; BMI must be greater than 17 for 12 months; normal laboratory test results; no psychotropic drugs required; no treatment or therapy for 12 months or more months Same criteria as (A); age 15 to 18, no hospitalization for 3 years Same criteria as (B); requires ongoing counseling or single psychotropic drug; no hospitalization for 2 years Does not meet any of the above criteria; under age 15	A B C D
Emphysema	Once Diagnosed	D
Endometriosis	Post menopausal; ovaries surgically removed; successfully treated with Lupron; no treatment for 6 months Same criteria as (A); no treatment for 3 months or ongoing treatment with hormones or birth control pills Does not meet any of the above criteria; potential surgical candidate; under treatment for infertility	A B D
Erectile Dysfunction (ED) Impotence	Surgically repaired or penile implant; no complications; no other treatment or therapy required Same criteria as (A); not released from surgeons care Not a surgical candidate; taking single prescription medication Ongoing testosterone injections or taking 2 prescription medications Does not meet any of the above criteria; potential implant or surgical candidate	A B A C D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Fibroids Fibroma of Uterus	Post Surgical: surgically corrected 3 or more months ago; no treatment, therapy or medications for 6 months	A
	Same criteria as (A); surgery completed or treated 1-3 months ago	B
	Same criteria as (B); surgery completed or treated 1-3 months ago	C
	Non-Surgical; Pre-menopausal: stable with no change in size for 12 months; no abnormal bleeding; treated with hormones or embolization	B
	Non-Surgical; Post-menopausal: no other uterine abnormality; stable in size for 6 months; normal laboratory test results; no treatment or medication for 6 months	A
	Does not meet any of the above criteria <i>Additional consideration for: size; type; location and stability of lesion</i>	D
Fibromyalgia	Condition resolved; no symptoms, treatment or therapy for 3 years	A
	Diagnostic work-up and testing completed with normal results; controlled with "over the counter (OTC)" medications; occasional use of prescription pain medication;	B
	Same criteria as (B); requires prescription pain medication or anti-depressant	C
	Does not meet any of the above criteria	D
Gallbladder Disorders <i>Including:</i> Cholecystitis Cholelithiasis Cholangitis	Gallbladder surgically removed and treatment free for 3 months; no complications; no problems OR treated medically; no treatment, therapy or medication for 12 months	A
	Same criteria as (A); no treatment, therapy or medications for 6 months	B
	Same criteria as (B); maintained on single prescription medication	C
	Does not meet any of the above criteria; potential surgical candidate	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
GERD (Gastro-esophageal Reflux Disease) <i>Including:</i> Acid reflux Acid indigestion Heartburn	All diagnostic tests completed; using "over the counter" (OTC) medications only; no treatment or prescription medications for 3 months; no smoking/tobacco use for 12 months; no respiratory complications; BMI less than 30	A
	Same criteria as (A); no treatment, therapy or prescription medications for 3 months; BMI 30-32	B
	Same criteria as (B); smoking/tobacco use within 1 year; requires single prescription medication; BMI 33-35	C
	Does not meet any of the above criteria	D
	<i>Additional consideration for:</i> obesity; prescription medications; anxiety and stress	Assessed by Underwriter
Graves Disease Goiter	See "Thyroid Disorders"	
Gout	Occasional episodes; no more than 1 per year; no medication in 3 months; no joint deformities or kidney stones	A
	Same criteria as (A); requires ongoing single medication	B
	Same criteria as (B); requires 2 prescription medications or treatment with steroids within 12 months	C
	Does not meet any of the above criteria; joint deformity or associated conditions	D
Hashimoto's Disease	See "Thyroid Disorders"	
Headache <i>Including:</i> Migraine Vascular Migraine	No symptoms or treatment for 6 months	A
	Diagnostic tests completed; controlled on single non-narcotic prescription medication (no Topamax); no ER visits for 6 months	B
	Same criteria as (B); requires 2 non-narcotic prescription medications; or maintained on Topamax; single ER visit in 3-6 months	C
	Does not meet any of the above criteria; taking prescription narcotics	D
Heart Disease <i>Including:</i> Angina Coronary Artery Disease Ischemic Heart Disease Myocardial Infarction (Heart Attack)	History of Angina only; no surgery recommended; no treatment, therapy or medications for 3 years; BMI less than 28	B
	Same criteria as (B); no treatment, therapy or medications for 2 years (single anti-lipid or cardiac medication acceptable) BMI 28-32	C
	<i>Individual consideration for:</i> obesity; multiple medications; multiple surgeries; smoking; respiratory disease; hypertension	Assessed by Underwriter

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Heart Disease <i>Including:</i> Arrhythmias Dysrhythmias Irregular Heartbeat Palpitations	<i>Individual consideration for:</i> type; severity and treatment. Pacemaker or defibrillator recipient or candidate	Assessed by Underwriter D
	<i>Individual consideration for:</i> obesity; multiple medications; multiple surgeries; smoking; respiratory disease; hypertension	
Heart Valve Disease <i>Including:</i> Mitral Valve Disease Mitral Valve Prolapse Murmur	Benign murmur only; no regurgitation; no medications required (precautionary antibiotics acceptable); no hypertension; no smoking; no other cardiac conditions; BMI less than 28	A
	Does not meet any of the above criteria; depending on severity of condition; treatment and complications	Assessed by Underwriter
Heart Valve Disease <i>Including:</i> Aortic Valve Disease Tricuspid Valve Disease	Normal heart function; normal kidney function; no medications (precautionary antibiotics acceptable); no treatment, therapy or medications for 5 years; no other cardiac conditions; no hypertension; no smoking for 5 years; BMI less than 28	A
	Same criteria as (A); no treatment, therapy or medications for 3 years; BMI 28-32	B
	Same criteria as (B); but one of the following: smoking within 2 years; no treatment, therapy or medications for 2 years; BMI 33-36	C
	Does not meet any of the above criteria	D
	Individual consideration for: obesity; multiple medications; multiple surgeries; smoking; respiratory disease; hypertension; other associated conditions	
Hepatitis	Hepatitis A: Single episode 6 more months ago; current normal Liver Function Tests (LFT's); no treatment, therapy or medication for 6 months	A
	Same criteria as (A); no treatment, therapy or medication for 3 months;	B
	Does not meet any of the above criteria	D
	Hepatitis B: Exposure only or immunization; laboratory test results positive for Antibodies - negative for Antigens; current LFT's normal; no immune disorder symptoms; no treatment, therapy or medication for 5 years	A
	Does not meet any of the above criteria All other Types of Hepatitis: C, D, E, Non-A, Non-B	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Hernia Hiatal Hernia	No surgery required; treated with "over the counter" medication	A
	Same criteria as (A); requires prescription medication	See GERD guidelines
	Surgically repaired over 3 months ago; no complication or infections; no long under treatment	A
	Surgically repaired less than 3 months ago; no complication or infections	B
	Does not meet any of the above criteria; may be a surgical candidate	D
Herniated Disc	See "Back Problems"	
Herpes <i>Including:</i> Genital Herpes Oral Herpes Herpes Zoster (shingles)	Periodic cold sores or fever blisters; using prescription medication	A
	Cold sores or fever blisters; requires treatment with prescription ointment or oral medication up to 6 times per year	B
	Cold sores or fever blisters; requires treatment with prescription medication more than 6 episodes per year	C
	Shingles; single episode requiring no treatment for 1 month	A
	Shingles; single episode with current treatment (non narcotic) or history of 2-3 episodes within 5 years	B
	Shingles; ongoing treatment, including anti-viral and or anti-depressant medication	C
	Genital Herpes; No outbreaks for 2 years	A
	Genital Herpes; requires occasional treatment with single prescription mediation up to 3 times per year	B
	Genital Herpes; requires occasional treatment with single prescription mediation up to 6 times per year	C
Does not meet any of the above criteria; anal or peri-anal herpes	D	

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
High Blood Pressure Hypertension	BMI less than 25; no smoking/tobacco use for 12 months; blood pressure controlled at 140/90 or less with single medication; normal laboratory test results; normal kidney function; no other cardiovascular conditions	A
	Individual consideration for: weight; BMI over 29; multiple medications; smoking; respiratory disease; elevated cholesterol; other associated conditions	Assessed by Underwriter
High Cholesterol Hypercholesterolemia Hyperlipidemia	<i>Individual consideration for:</i> weight; BMI; blood cholesterol and lipid levels; medications; associated conditions	Assessed by Underwriter
Hyperactivity <i>Including:</i> Attention Deficit Disorder (ADD) Attention Deficit Hyperactivity Disorder	Over age 18; maintained on single medication for at least 3 months; no other nervous, mental or developmental disorders; no other psychotropic medications	B
	Same criteria as (B); maintained on a single medication less than 3 months or diagnosed with last 3 months; maintained on a combination or 2 prescription medications for 6 or more months OR	C
	Age 5-18; maintained on single prescription medication for 3 or more months; receiving counseling; no other nervous, mental or developmental disorders	C
	Does not meet any of the above criteria	D
Inflammatory Bowel Disorders <i>Including:</i> Colitis Crohn's Disease Regional Enteritis	Surgical removal 3 or more years ago; no stoma; does not require steroids or immunosuppressive medications; no other treatment, therapy or medications for 1 year	B
	Same criteria as (B); surgery 1 or more years ago; stoma; stable on single anti-inflammatory medication for 1 year	C
	Does not meet any of the above criteria	D
Inflammatory Bowel Disorders <i>Including:</i> Idiopathic Proctocolitis Ulcerative Colitis	Single episode; no maintenance medications; no treatment, therapy or medications for 5 years or surgical resection 5 years or more ago	A
	Surgery completed 3 or more years ago; no stoma; stable on single maintenance medication; no other treatment, therapy or medications for 3 years	B
	Same criteria as (B); no treatment, therapy or medications for 2 years; has stoma or ileal pouch	C
	Does not meet any of the above criteria; potential surgical candidate	D
Irregular Heart Beat	See "Heart Disease"	

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Irritable Bowel Syndrome (IBS)	Diagnostic work up complete; no treatment, therapy or medications for 12 months; taking OTC medications only	A
	Same criteria as (A); Controlled with single prescription medication; no treatment, therapy or medications for 6 months (stool softeners/fiber acceptable)	B
	Same criteria as (B); currently controlled with 2 prescription medications	C
	Does not meet any of the above criteria; potential surgical candidate	D
Jaw Disorders TMJ Malocclusion Other Jaw Disorders	TMJ only: Not a surgical candidate; use of mouth piece only; no other treatments or medications for 1 year or surgically repaired more than 6 months ago	A
	Same criteria as (A); requires single prescription medication; no treatment, therapy or medications for 3 months; surgically repaired 3-6 months ago	B
	Other Jaw Disorders: All surgical and dental reconstruction completed more than 1 year ago; cosmetically and functionally acceptable; no treatment, therapy or medications for 6 months	A
	Same criteria as (A); surgically repaired 6-12 months ago; requires single prescription medication; no treatment, therapy or medications for 3 months	B
	Same criteria as (B); surgically repaired 3-6 months ago	C
	Does not meet any of the above criteria; potential surgical candidate	D
Kidney Stone (calculus) Ureter Stone	Single episode 3-6 months ago; passed spontaneously; no intervention required; no treatment, therapy or medications for 3 months	A
	Same criteria as (A); two episodes in 2 years; single episode more than one month ago; no other treatment or therapy for 1 month	B
	2 episodes in 2 years; maintained on single anti-stone medication	C
	Does not meet any of the above criteria; potential surgical candidate	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Knee Disorders <i>Including:</i> ACL Tear Effusion Posterior Cruciate Tear Anterior Cruciate Tear Acute Sprains Medical Ligament Tear Knee Cysts Knee Calcifications	Surgically corrected 12 or more months ago; no treatment, therapy or medications for 6 or more months	A
	Surgically corrected 6 or more months ago; no treatment, therapy or medications for 3 or more months	B
	Not surgically corrected; no treatment, therapy or medications for 6 months	C
	Does not meet any of the above criteria; potential surgical or joint replacement candidate	D
Lupus Lupus Erythematosus Systemic Lupus Discoid Lupus	Assessed by Underwriter	C or D
	Systemic Lupus Erythematosus (SLE) Once Diagnosed	D
Muscular Dystrophy	Once Diagnosed	D
Multiple Sclerosis	Once Diagnosed	D
Obesity (Assessing risk for weight alone with no other health conditions) Obesity Children up to age 18 (Assessing risk for weight alone with no other health conditions)	BMI less than 31; no smoking/tobacco use for 12 months; no other health conditions	A
	BMI 25-30; but smoking/tobacco use within 12 months	B
	BMI 31-36; no smoking/tobacco use for 12 months; no other health conditions	B
	BMI 31-36; but smoking/tobacco use within 12 months	C
	BMI 37-42; no smoking/tobacco use for 12 months; no other health conditions	C
	BMI 43 and over	D
	BMI > 3rd percentile and < 97th percentile	A
	BMI < 3rd percentile and medical records document a normal growth pattern and no associated conditions.	B
	BMI > 97th percentile and medical records document normal growth pattern, no obesity related or associated conditions	B
	Does not meet any of the above criteria	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Osteoporosis <i>Including:</i> Osteopenia	Treatment with hormone replacement therapy (HRT): no fractures; pre or post-menopausal	A
	Same criteria as (A); smoking/tobacco use within 12 months; OR maintained on single prescription medication; history of pathological fracture 12 months ago; no treatment or therapy for 6 months	B
	Same criteria as (B); smoking/tobacco use within 12 months; Maintained on 2 prescription medications; history of pathological fracture 6-12 months ago	C
	Does not meet any of the above criteria	D
Pancreatitis	Single acute episode; full recovery; no treatment or medication for 6 months; OR single episode as a result of surgical complications; full recovery; no treatment or medications for 6 months	A
	Same criteria as (A); single medication for GERD; no other treatment or medication for 3 months	B
	Does not meet any of the above criteria	D
Pregnancy	Non-pregnant dependent children can be underwritten on "child only" or "children-only" policy according to underwriting risk criteria	Assessed by Underwriter
	Pregnant applicant, spouse (civil union partner), dependent or significant other; in process of adopting or surrogate pregnancy	D
Prostate Disorders Benign Prostate Hyperplasia (BPH)	Incidental finding; no symptoms; no treatment required; no surgery required or recommended; PSA normal	A
	Removed by laser or surgery 6 or more months ago; no ongoing complications; no treatment, therapy or medications for 6 months; no further treatment required	A
	Same criteria as (A); surgery less than 6 months ago and/or maintained on a single prescription medication	B
	Does not meet any of above criteria	D
Prostate Disorders Prostatitis	Single episode in 12 months; no hospital admission; no urinary retention; normal PSA and Kidney Function test; no treatment therapy or medications for 6 months	A
	Same criteria as (A); 2 episodes in 2 years; no treatment for 3 months	B
	Same criteria as (B); recurrent chronic infection; not a surgical candidate; no treatment, therapy or medication for 6 months	C
	Does not meet any of the above criteria; potential surgical candidate	D

AETNA ADVANTAGE PLANS RISK CRITERIA

Listed Condition	Risk Criteria	Risk Category
Psoriasis	Controlled with OTC treatments; periodic use of prescription medication (up to 2 prescriptions per year)	A
	Requires light therapy; ongoing use of single topical prescription medication	B
	Same criteria as (B); or periodic oral prescription medication such as methotrexate or cyclosporine	C
	Does not meet any of the above criteria, or requires "Biologic Drugs" such as Enbrel or Amevive	D
Skin Conditions <i>Including:</i> Eczema Dermatitis Poison Oak Folliculitis	Acute episode: treated with OTC medication or intermittent use of prescription cream, lotion, shampoo or anti-histamines	A
	Ongoing use of single topical prescription and/or anti-histamine	B
	Severe: requiring occasional treatment with oral or injectable steroids; ongoing treatment with 2-3 prescription medications	C
	Does not meet any of the above criteria; related to immune disorder	D
Skin Conditions <i>Including:</i> Keratosis	Ongoing use of OTC medication; cryosurgery 1-2 times per year.	A
	Requires cryosurgery 3-4 times per year; ongoing treatment with topical prescription medication; curettage or shave removal within 6 months; history of Basal Cell Carcinoma or Squamous cell carcinoma	B
	Does not meet any of the above criteria Current skin cancers will be underwritten separately	D
Skin Conditions <i>Including:</i> Nail Fungus Tinea Unguium	Currently using OTC medication or previously treated with oral anti-fungal medication over 3 months ago with no recurrence	A
	Same criteria as (A); currently under treatment with prescription topical anti-fungal or previously treated with oral anti-fungal medication within 6 weeks and normal Liver Function Tests	B
	Does not meet risk criteria; currently under treatment with prescription oral anti-fungal medication	D
Sleep Apnea –Adults <i>Including:</i> Obstructive Apnea	Surgically repaired 3 or more months ago, no treatment, therapy or medications for 3 months; no smoking/tobacco use for 12 months	A
	Not a surgical candidate; BMI less than 28, no smoking/tobacco use for 12 months, no monitor or CPAP/BiPAP required	A
	Same criteria as (A); BMI 28-32	B
	Same criteria as (B); BMI 33-35, requires monitor or CPAP/BiPAP	C
